Popovers

Add small overlays of content, like those on the iPad, to any element for housing secondary information.

Popovers whose both title and content are zero-length are never displayed.

Examples

Click to toggle popover

```
<popover title="Popover title" content="And here's some amazing content. It's very engaging. Right?"><btn type="danger" size="lg">Click to toggle popover</btn></popover>
```

Four directions

Four options are available: `top`, `right`, `bottom`, and `left` aligned.

Popover on right Popover on top Popover on bottom Popover on left

```
<popover placement="right" content="Vivamus sagittis lacus vel augue laoreet rutrum faucibus.">
<btn>Popover on right</btn>
</popover>

<popover placement="top" content="Vivamus sagittis lacus vel augue laoreet rutrum faucibus.">
<btn>Popover on top</btn>
</popover>

<popover placement="bottom" content="Vivamus sagittis lacus vel augue laoreet rutrum faucibus.">
<btn>Popover on bottom</btn>
</popover>

<popover placement="left" content="Vivamus sagittis lacus vel augue laoreet rutrum faucibus.">
<btn>Popover on left</btn>
</popover>
```

Dismiss on next click

Use the `focus` trigger to dismiss popovers on the next click that the user makes.

Dismissible popover

```
<popover trigger="focus" title="Dismissible popover" content="And here's some amazing content. It's very engaging. Right?"><btn type="danger" size="lg">Dismissible popover</btn></popover>
```

DokuWiki syntax

Dismissible Popover

```
<popover html="true" title="**Dismissible** popover" content="And here's some amazing content. \\ **It's very engaging**. \\ Right?">Dismissible Popover</popover>
```

Options

Name	Default	Values	Description
`animation`	`true`	`true false`	Apply a CSS fade transition to the popover
`content`	NULL		The content value
`title`	NULL		The title value
`html`	`false`	`true false`	Insert DokuWiki syntax into the popover
`placement`	`right`	`top bottom left right auto`	How to position the popover. When `auto` is specified, it will dynamically reorient the popover. For example, if placement is `auto left`, the popover will display to the left when possible, otherwise it will display right.
`trigger`	`click`	`click hover focus manual`	How popover is triggered. You may pass multiple triggers; separate them with a space. `manual` cannot be combined with any other trigger.

`delay`
`delay-show`
`delay-hide`
	`0`		Delay showing and hiding the popover (ms) - does not apply to manual trigger type
			If a number is supplied, delay is applied to both hide/show.
